

# ***CAMPFIRE DANGER!***

The Director of Camp Fatima has advised us that campfires must be kept at an absolute minimum due to dry ground conditions. Campers have permission to have campfires only in designated fireplaces. Please act accordingly. Residents around the lake have filed complaints with the local Fire Department about campfires that are too large. Please be aware of the concern that underground tree roots could ignite. Campfire privileges may be revoked when necessary. All ashes and tinder must be completely watered down and removed before you leave. Please do not jeopardize our privilege to keep campfires during future Camporees.
